# Phalcon-JQuery

Phalcon-JQuery is a PHP library compatible with the Framework Phalcon. It allows to easily integrate jQuery, jQuery UI or Bootstrap in Phalcon Web projects, respecting the separation of MVC layers.

## -- Installation

1. Download Phalcon-JQuery on gitHub
2. Unzip the archive in a local folder and copy the Ajax folder and his content in the folder libraries defined in your Phalcon configuration file :

```
    'application' => array(
        'controllersDir' => __DIR__ .
'/../../app/controllers/',
        'modelsDir'      => __DIR__ .
'/../../app/models/',
        'viewsDir'       => __DIR__ .
'/../../app/views/',
        'pluginsDir'     => __DIR__ .
'/../../app/plugins/',
        'libraryDir'     => __DIR__ .
'/../../app/library/',
        'cacheDir'       => __DIR__ .
'/../../app/cache/',
        'baseUri'        => '/atp/',
    )
</config>
```

## -- Configuration

### -- Service injection

For adding Phalcon-JQuery to a Phalcon project, it is necessary to inject the JQuery service at application startup

:

```
$di->set("jquery",function(){
    $jquery= new JsUtils(array("driver"=>"Jquery"));
    $jquery->ui(new JqueryUI());//optional for JQuery UI
    $jquery->bootstrap(new Bootstrap());//Optional for Twitter Bootstrap
    return $jquery;
});
```
