

Phalcon-JQuery

	<p>Phalcon-JQuery is a PHP library compatible with the Framework Phalcon. It allows to easily integrate jQuery, jQuery UI or Bootstrap in Phalcon Web projects, respecting the separation of MVC layers.</p>
---	--

-- Installation

1. Download Phalcon-JQuery on [github](#)
2. Unzip the archive in a local folder and copy the Ajax folder and his content in the folder libraries defined in your Phalcon configuration file :

	<pre> 'application' => array('controllersDir' => __DIR__ . '../../../../app/controllers/', 'modelsDir' => __DIR__ . '../../../../app/models/', 'viewsDir' => __DIR__ . '../../../../app/views/', 'pluginsDir' => __DIR__ . '../../../../app/plugins/', 'libraryDir' => __DIR__ . '../../../../app/library/', 'cacheDir' => __DIR__ . '../../../../app/cache/', 'baseUri' => '/atp/',) </config> </pre>
---	--

-- Configuration

-- Service injection

For adding Phalcon-JQuery to a Phalcon project, it is necessary to inject the JQuery service at application startup

:

```
$di->set("jquery",function(){
    $jquery= new JsUtils(array("driver"=>"Jquery"));
    $jquery->ui(new JQueryUI());//optional for JQuery UI
    $jquery->bootstrap(new Bootstrap());//Optional for Twitter Bootstrap
    return $jquery;
});
```

-- JS libraries integration
