-- Service injection

For adding Phalcon-JQuery to a Phalcon project, it is necessary to inject the JQuery service at application startup :

$di->set("jquery",function(){
    $jquery= new JsUtils(array("driver"=>"Jquery"));
    $jquery->ui(new JqueryUI());//optional for JQuery UI
    $jquery->bootstrap(new Bootstrap());//Optional for Twitter Bootstrap
    return $jquery;
