

# Phalcon-JQuery

	<p>Phalcon-JQuery is a PHP library compatible with the Framework Phalcon. It allows to easily integrate jQuery, jQuery UI or <a href="#">Bootstrap</a> in Phalcon Web projects, respecting the separation of MVC layers.</p>
---	--

## -- Installation

1. Download Phalcon-JQuery on [github](#)
2. Unzip the archive in a local folder and copy the Ajax folder and his content in the folder libraries defined in your Phalcon configuration file :

	<pre>'application' =&gt; array(     'controllersDir' =&gt; __DIR__ .     '/../..../app/controllers/',     'modelsDir' =&gt; __DIR__ .     '/../..../app/models/',     'viewsDir' =&gt; __DIR__ .     '/../..../app/views/',     'pluginsDir' =&gt; __DIR__ .     '/../..../app/plugins/',     'libraryDir' =&gt; __DIR__ .     '/../..../app/library/',     'cacheDir' =&gt; __DIR__ .     '/../..../app/cache/',     'baseUri' =&gt; '/atp/', ) &lt;/config&gt;</pre>
---	--

## -- Configuration

### -- Service injection

For adding Phalcon-JQuery to a Phalcon project, it is necessary to inject the JQuery service at application startup

:

```
$di->set("jquery",function(){  
    $jquery= new JsUtils(array("driver"=>"Jquery"));  
    $jquery->ui(new JQueryUI());//optional for JQuery UI  
    $jquery->bootstrap(new Bootstrap());//Optional for Twitter Bootstrap  
    return $jquery;  
});
```
