3.1 Cproducts - Add Product

The screenshot shows a web form titled "Add product". It features a "Project name" label followed by a text input field containing "Exemple : My Project". Below this is a "Description" label followed by a large, empty text area. At the bottom of the form is a button labeled "Add this project" with a green plus icon to its left.

```

view.getBtnProducts().addSelectionListener(new SelectionListener() {

    @Override
    public void widgetSelected(SelectionEvent arg0) {
        if (view.getBtnProducts().getText() == "Add this project") {
            if (view.getTxtNameProject().getText().equals("") ||
view.getTxtDescriptionProduct().getText().equals("")) {
                Utils.MsgBox(view.getShell(), "Please complete all fields",
"information");
            } else {

                boolean nomUtilise = false;
                for (Product product : DAO.getProducts()) {
                    if
(product.getName().equals(view.getTxtNameProject().getText())) {
                        nomUtilise = true;
                    }
                }
                if (nomUtilise == true) {
                    Utils.MsgBox(view.getShell(), "A project already has
this name", "information");
                } else {
                    Product product = new
Product(view.getTxtNameProject().getText(),
view.getTxtDescriptionProduct().getText(), null, null, null);
                    DAO.SQLProduct(product, "insert");
                    view.getTableViewerProducts().add(product);
                    Utils.MsgBox(view.getShell(), "Project is create",
"information");
                }
            }
        }
    }
});

```

```
        }  
    } else {  
        // Code update product  
    }  
}  
  
});
```
