

# Scrumtool : Gestion de projet de type SCRUM

## Gestion des projets

### 1- Fonctionnalités

Acteur : Administrateur

### 2- Vues

The image shows a screenshot of a web application interface for adding a product. The interface is titled 'Add product' in the top right corner. It features two main input fields: 'Project name' and 'Description'. The 'Project name' field contains the text 'Exemple : My Project'. Below it is a larger, empty 'Description' field. At the bottom right of the form, there is a button labeled 'Add this project' with a green plus icon.

```

view.getBtnProducts().addSelectionListener(new SelectionListener() {

    @Override
    public void widgetSelected(SelectionEvent arg0) {
        if (view.getBtnProducts().getText() == "Add this project") {
            if (view.getTxtNameProject().getText().equals("") ||
view.getTxtDescriptionProduct().getText().equals("")) {
                Utils.MsgBox(view.getShell(), "Please complete all fields",
"information");
            } else {

                boolean nomUtilise = false;
                for (Product product : DAO.getProducts()) {
                    if
(product.getName().equals(view.getTxtNameProject().getText())) {
                        nomUtilise = true;
                    }
                }
                if (nomUtilise == true) {
                    Utils.MsgBox(view.getShell(), "A project already has
this name", "information");
                } else {
                    Product product = new
Product(view.getTxtNameProject().getText(),
view.getTxtDescriptionProduct().getText(), null, null, null);
                    DAO.SQLProduct(product, "insert");
                    view.getTableViewerProducts().add(product);
                    Utils.MsgBox(view.getShell(), "Project is create",
"information");
                }
            }
        }
    }
});

```

```
        }  
    } else {  
        // Code update product  
    }  
}  
  
});
```

### 3.2 Cproducts - Edit Product

The screenshot shows a web form titled "Add product". It contains two main input fields: "Project name" with the example text "Exemple : My Project" and a "Description" field which is currently empty. At the bottom of the form is a button labeled "Add this project" with a green plus icon.

```
view.getBtnProducts().addSelectionListener(new SelectionListener() {  
    @Override  
    public void widgetSelected(SelectionEvent arg0) {  
        if (view.getBtnProducts().getText() == "Add this project") {  
            // Code add product  
        } else {  
            if (view.getTxtDescriptionProduct().getText().equals("")) {  
                Utils.MsgBox(view.getShell(), "Please complete all fields",  
"information");  
            } else {  
                productActif.setName(view.getTxtNameProject().getText());  
productActif.setDescription(view.getTxtDescriptionProduct().getText());  
            }  
        }  
    }  
});
```

```
        DAO.SQLProduct(productActif, "update");  
        view.getTableViewerProducts().refresh();  
        Utils.MsgBox(view.getShell(), "Project is update",  
"information");  
    }  
}  
});
```
