 - Composants

Application messagerie (suite)

Les composants permettent d'associer un comportement à un ensemble d'éléments visuels paramétrables et réutilisables.

Création

```
public class ButtonConfirmation {
    public static void main(String[]args) throws IOException {
        VueComponent compo=new VueComponent("confirm-button");
        compo.setProps("title","message","validateCaption","type","size");
        compo.addProp("width", 500);
        compo.addMethod("validation",
"this.$emit('validation');this.dialog=false;");
        compo.setDefaultTemplateFile();
        compo.createFile(false);
    }
}
```

```
<v-dialog v-model="dialog" :width="width">
