

Relations

2 grands types de relations existent :

- manyToOne/oneToMany
- manyToMany

manyToOne/oneToMany

Correspond aux associations hiérarchiques de type CIF.

manyToOne et **oneToMany** correspondent au même type d'association, mais vus de chaque côté de la relation.

manyToOne

Exemple

CREATED WITH YUML

Chaque produit appartient à une catégorie :

```
// ...
class Product{
    // ...

    /**
     * @ORM\ManyToOne(targetEntity="App\Entity\Category", inversedBy="products")
     * @ORM\JoinColumn(nullable=true)
     */
    private $category;

    public function getCategory(): Category
    {
        return $this->category;
    }

    public function setCategory(Category $category)
    {
        $this->category = $category;
    }
}
```
