

SpringBoot + VueJS

Element UI + VueJS integration

Dans la vue index.html :

```
<!DOCTYPE html>
<html>
<head>
  <meta charset="UTF-8">
  <!-- import CSS -->
  <link rel="stylesheet"
href="https://unpkg.com/element-ui/lib/theme-chalk/index.css">
  <link href="https://fonts.googleapis.com/css?family=Lato" rel="stylesheet">
  <link rel="stylesheet" href="/css/style.css">
  <!-- import Vue before Element -->
  <script src="https://unpkg.com/vue/dist/vue.js"></script>
  <!-- import JavaScript -->
  <script src="https://unpkg.com/element-ui/lib/index.js"></script>
</head>
```

```
body{
  font-family: 'Lato', sans-serif;
}

a.el-button{
  text-decoration: none;
}
```

Test

Créer un contrôleur Spring :

```
@Controller
@RequestMapping("/ui/")
public class UiTest {
  @GetMapping("test")
  public String test(ModelMap model) {
    VueJS vue=new VueJS("#app");
    vue.addData("input", "Hello world !");
    model.put("vueJS", vue.getScript());
    return "ui/test";
  }
}
```

Et la vue associée :

```
{{>/header}}  
<%input%>  
<el-input placeholder="Please input" v-model="input"></el-input>  
{{{vueJS}}}  
{{>/footer}}
```
