Ember.js

Anciennement SproutCore 2.0, devenu Amber en 2011, puis Ember, est un framework front-end MVC devenu MRC (Model Route Composant) dans sa version 2.
Ember est soutenu par une communauté de développeurs active et reste indépendant de toute multi-nationale.

Concepts/outils

Outil	Description
Ember-cli	Outil en ligne de commande permettant de créer des applications Ember
Routing	The central part of an Ember application. Enables developers to drive the application state from the URL.
Template engine	Use Handlebars syntax to write your application's templates
Data layer	Ember Data provides a consistent way to communicate with external APIs and manage application state
Ember inspector	A browser extension, or bookmarklet, to inspect your application live. It's also useful for spotting Ember applications in the wild, try to install it and open up the NASA website!
